

Release Notes—AJA Driver v10.3.2

Drivers for all KONA and Io products

General

This driver version is compatible with Mac OS X 10.7 (Lion) and OS X 10.8 (Mountain Lion).

If installing onto a computer that has previously had another video capture card or drivers, we recommend running the AJA Conflict Checker utility BEFORE installing the software.

The AJA Conflict Checker will help you identify old drivers or software files that need to be removed before installing the new software.

Also, please read the "ReadMeFirst.PDF" document, particularly if installing for the first time.

Installation Notes—Please Read

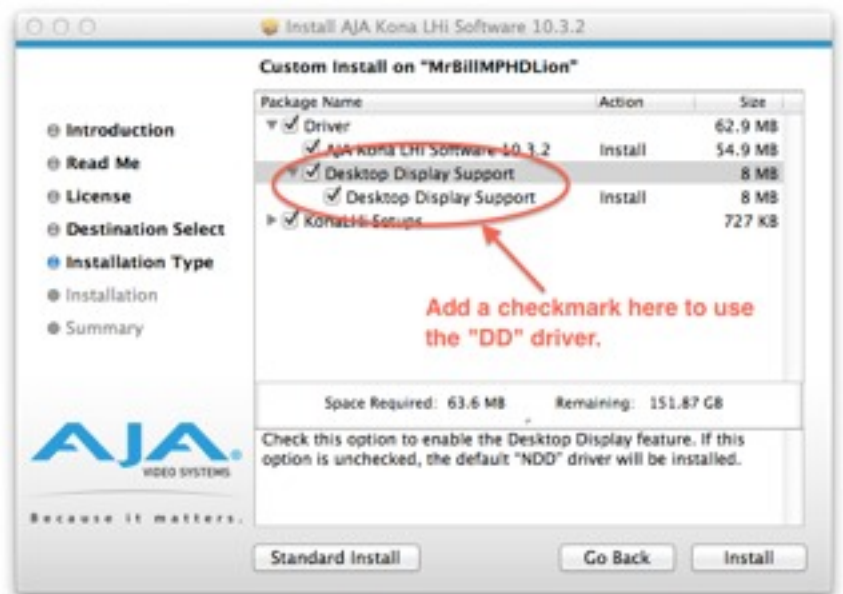

Combined installer

AJA previously distributed separate installers for the normal, non-Desktop-Display (NDD) driver and another that installed the Desktop Display (DD) driver.

AJA now distributes only one installation package that can install either one.

AJA recommends performing a Standard Install, which does not install the Macintosh Desktop feature.

Users who need this feature must perform a custom install, and specifically check the "Desktop Display Support" option:

Mac OS X 10.8 Gatekeeper

On Mountain Lion, ensure that the Security & Privacy settings are configured to allow applications downloaded from Mac App Store and identified developers, as shown.

New Features

- Support for Mountain Lion OS including Gatekeeper (All products)

Improvements

- Addressed some issues associated with analog audio monitoring levels (Io XT)
- Addressed an issue with audio distortion at loud levels (Io XT)
- Addressed an issue with DVCproHD chroma levels (KONA LHe Plus)

Relevant Products

The following products are covered by this update:

- KONA 3G
- KONA 3
- KONA LHi
- KONA LHe Plus
