

## Release Notes—v10.0.1

### Mac Software for KONA 3G, KONA 3, KONA LHi, KONA LHe Plus and Io Express

#### General

This release provides improvements for the AJA products listed above. If you are installing your KONA or Io Express into a computer that has previously had another video capture card or drivers, we recommend running the AJA Conflict Checker utility BEFORE installing the KONA software. The AJA Conflict Checker will help you identify old drivers or software files that need to be removed before installing the new software. Also, please read the “ReadMeFirst.PDF” document on the installation CD, particularly if you are installing for the first time.

#### Installation Notes—Please Read

Please ensure that you use the correct installer for the AJA product present in your system (KONA/Io Express). If you install the wrong software, the AJA Control Panel will report “no board” due to incorrect driver installation. Also, if you should ever wish to regress to an earlier version of software, you will have to perform the following steps to ensure proper operation. *Do not try to simply run an older AJA installer over a newer version*—doing so will not properly remove the newer components and will lead to improper operation.

1. Run the AJA Uninstaller from the current installation.
2. Install the desired AJA software using its installer package.

After installing the AJA driver, if you experience any issues booting your computer, restart the computer while holding down the shift key (safe boot), uninstall the AJA driver and then install the NDD driver version instead. The AJA KONA and Io Express driver version 10.0.1 NDD is the same as driver version 10.0.1, but removes the Macintosh Desktop Display feature.

#### New Features

- Support added for Avid® Media Composer® 6.0, Symphony® 6.0, and NewsCutter® 10. (KONA 3G, KONA 3, KONA LHe Plus, KONA LHi, and Io Express)
- Graphically enhanced AJA Control Panel (KONA 3G, KONA 3, KONA LHe Plus, KONA LHi, and Io Express)

#### Improvements

- Fixed Audio/Video sync issues with Avid Media Composer

#### Recommended Configuration for Mac Computers

For information on Mac computer slot configuration for KONA cards, please visit the following page on the AJA website: <http://www.aja.com/support/kona/kona-system-configuration.php>
