

Release Notes—VTR Xchange 4.1

New Features

- New VTR Xchange application icon.
- "Grab" scripting command added for use with AppleScript.
- Closed Captioning support added: CC capture enable checkbox in Main window and Player window now has "CC" checkbox for enabling output of CC track data.
- Supports capturing from a Sony SRW-5800 playing back in DBL mode. DBL mode is detected by the presence of "DBL" at the end of the video source name.

Improvements and Fixes

- PAL movies now playback with fields not flipped.
- Addressed issue where 2 channel audio recording deck would not do the insert edit if "Discrete Channels" was chosen in the Audio Mapping panel.
