

Release Notes—KONA LHi version 6.5.1

General

If you are installing your KONA hardware into a computer that has previously had another video capture card or drivers, we recommend running the AJA KONA Conflict Checker utility BEFORE installing the KONA software. The AJA KONA Conflict Checker will help you identify old drivers or software files that need to be removed before installing the new software. Also, please read the “ReadMeFirst.PDF” document on the installation CD, particularly if you are installing for the first time.

Installation Notes—Please Read

Note: *Version 6.5.1 supports Final Cut Studio Version 3 and Version 2. Not all features will work with versions earlier than Version 3. Please ensure you use the correct software for your system. AJA Driver Compatibility as of KONA Version 6.5 software is as follows:*

FCP 7 - 6.0.x - KONA Driver version 6.5.1 (Leopard OS compatible version)
FCP 6.0.x - KONA Driver version 6.0.3 (Leopard and Tiger OS compatible version)
FCP 6.0.x - KONA Driver versions 5.0 through 5.1 NDD (Leopard and Tiger OS compatible versions)

After installing the AJA driver, if you experience any issues booting your computer, restart the computer while holding down the shift key (safe boot), uninstall the AJA driver and then install the NDD driver version instead. The AJA KONA driver version 6.5 NDD is the same as driver version 6.5, but removes the Macintosh Desktop Display feature.

In This Release

Improved KONA LHi compatibility with AJA Mac Plug-Ins for Adobe and Adobe Creative Suite.

Recommended Configuration for Mac Computers

For information on Mac computer slot configuration for KONA cards, please visit the following page on the AJA website: <http://www.aja.com/support/kona/kona-system-configuration.php>
