Chapter 1: Introduction

Overview

AJA's ROI (region of interest) scaling converter can be used out-of-the-box to convert either DVI or HDMI input signals to SDI output. In default mode, ROI automatically detects the input DVI format and converts it to the SDI video format. In this startup Auto mode, the full-size DVI input is output to the SDI output. The picture's aspect ratio is maintained and if the SDI monitor is larger than the DVI input, unused area is filled with matte color. Default audio setup passes 8-channel HDMI audio.

To realize the full power of ROI, however, you will use the supplied USB cable and AJA's MiniConfig application (included on your CD) to select SDI output format and perform a host of region-of-interest (ROI) and output display scaling operations.

Audio Handling: Analog audio from the host can be input via a standard 3.5mm audio cable and mapped to the embedded SDI stream. Alternatively, if the input is HDMI, the embedded audio can be the audio input.

Control Interface: For control, the ROI is connected to a computer via USB. The ROI has no local, physical user-interface (no dipswitch settings). The ROI can operate stand-alone without a USB connection to the host. In this mode, the ROI automatically adapts to the input DVI/HDMI signal, and operates according to defaults or as last configured via the AJA MiniConfig application (see ["Operation" on page 10](#)).

IMPORTANT: The ROI Converter honors HDCP protection and performs in the following manner:

If the input content is HDCP protected, the ROI converter will display video on the DVI pass-through connector, but not on the SDI output.

For sources that have HDCP turned on all the time, the ROI converter will not display on the SDI output but will display only on the DVI pass-thru.

If a DVI monitor is not connected to the DVI pass-thru, then the EDID information comes from the ROI converter directly. In this case, the EDID information from the ROI will not accept the incoming HDCP protected input even though some sources will turn off the HDCP encryption for unprotected content.

ROI will not provide an SDI output for HDCP content - and the EDID source changes depending on if a monitor is plugged in or not.

Features:

- Convert DVI/HDMI inputs to SDI/HD-SDI
- User-adjustable “region of interest”
- 4:3/16:9 conversion modes supported
- Setup via PC/Mac using USB port and supplied USB cable (AJA MiniConfig software application supplied on CD)
- Frame-rate conversion
- Automatic configuration to input video raster and frame rate
- SDI output configurable to most common SD and HD formats (1080i59.84 max)
- Genlock with reference input
- Audio input via 3.5mm2-channel analog input or 8-channel HDMI embedded
- Embedded SDI audio out (up to 8 channels)
- Uses universal input +5V power supply AJA model DWP-U-R1 (included)
- 5-year warranty

NOTE: Frame rates are limited by the 165Mhz maximum rate of the DVI Receiver

MiniConfig Overview:

Using AJA's MiniConfig application, you can set up and control the following:

- Video:**
- Output format select
 - Aspect Ratio convert
 - 4:3 to 16:9: Sidebar, 14:9, Full
 - 16:9 or 16:10 to 4:3: Letterbox, Full
 - 16:10 to 16:9: Letterbox, Full

- Region of Interest:**
- On/Off
 - Size/Position (scroll bars, buttons, or numerical entry)

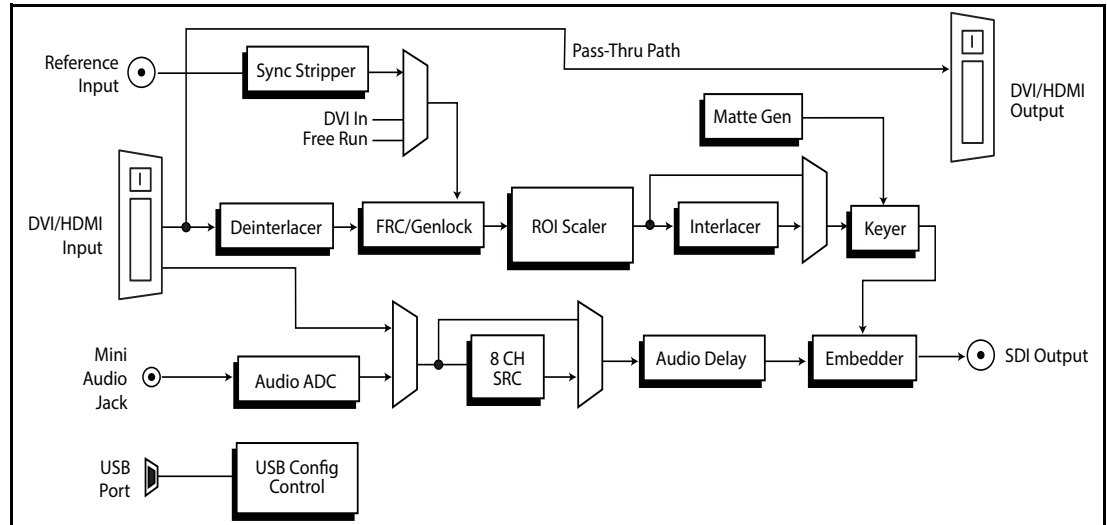

- Audio:**
- Input Select: Analog (2-channel), HDMI (8-channel)
 - Mute Audio out

- Input Data Range Control:**
- 1-255 (default – 8-bit nomenclature)
 - 16-235

- Genlock:**
- Standard sync options

Block Diagram

Figure 1. ROI Converter/Scaler, Simplified Block Diagram

I/O Connections

Figure 2. ROI Converter/Scaler

DVI/HDMI Input: Connects to your Computer or single-link source device.

To connect an HDMI video input to the ROI DVI input connector, use a passive DVI-to-HDMI adapter (user-supplied). You can also use a cable adapter that has a DVI connector on one end of the cable and an HDMI connector on the other.

Analog Audio: A single 3.5 mm analog audio connector accepts two channels of analog audio which can be embedded into the SDI output as determined by the default configuration or audio configuration selections using AJA MiniConfig.

USB Port: Accepts USB mini connector

DVI/HDMI Output: This is a pass-through output for use on a second computer monitor for using Screen Picker. Connections are the same as described for DVI/HDMI input above.

SDI Video Output: Standard BNC connector for coaxial SDI monitor connection.

Reference Video Input: The Reference BNC accepts an Output timing reference signal. The reference can be SD Blackburst or HD tri-level sync. Permissible reference video inputs include:

- 525 Color Black
- 625 Color Black
- 1080i Tri-level Sync
- 720p Tri-level Sync

Setup options available via the MiniConfig interface are described under [“Genlock” on page 19](#)

Typical ROI Configurations

Three typical configurations for using the ROI for scaling of desktop region-of-interest video are illustrated in the following figures. In these configurations, the pass-through monitor is used to view the subject desktop video and use the MiniConfig application's Screen Picker function to select the desired region for output to SDI (see [“Variable Selection” on page 15](#)).

NOTE: When using the Screen Picker function, the MiniConfig panel must be located on the Target (pass-through) monitor with the subject desktop video.

Figure 3. ROI with Laptop Computer, System Interconnect Diagram

Figure 4. ROI with Single Computer Output, System Interconnect Diagram.

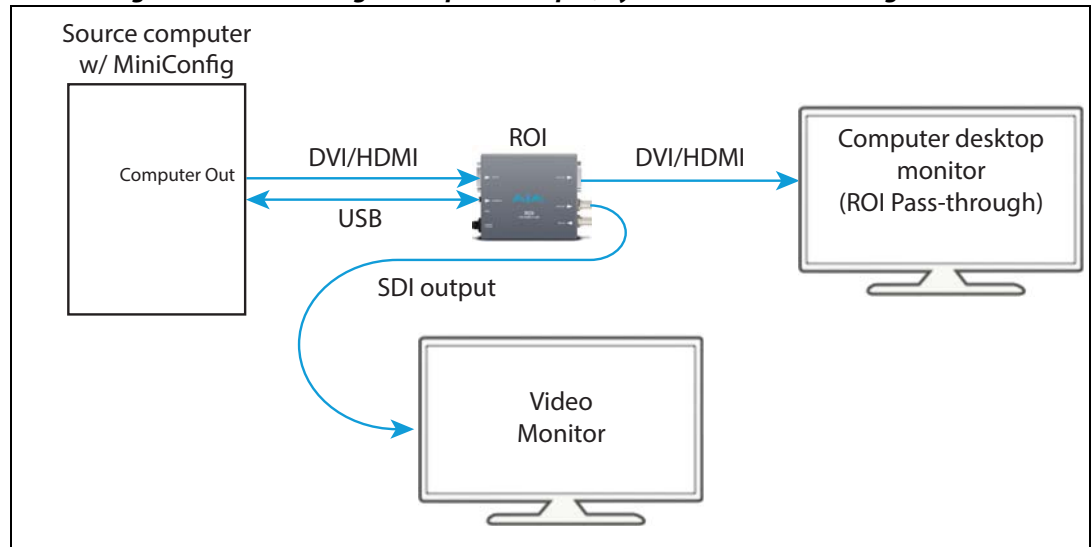

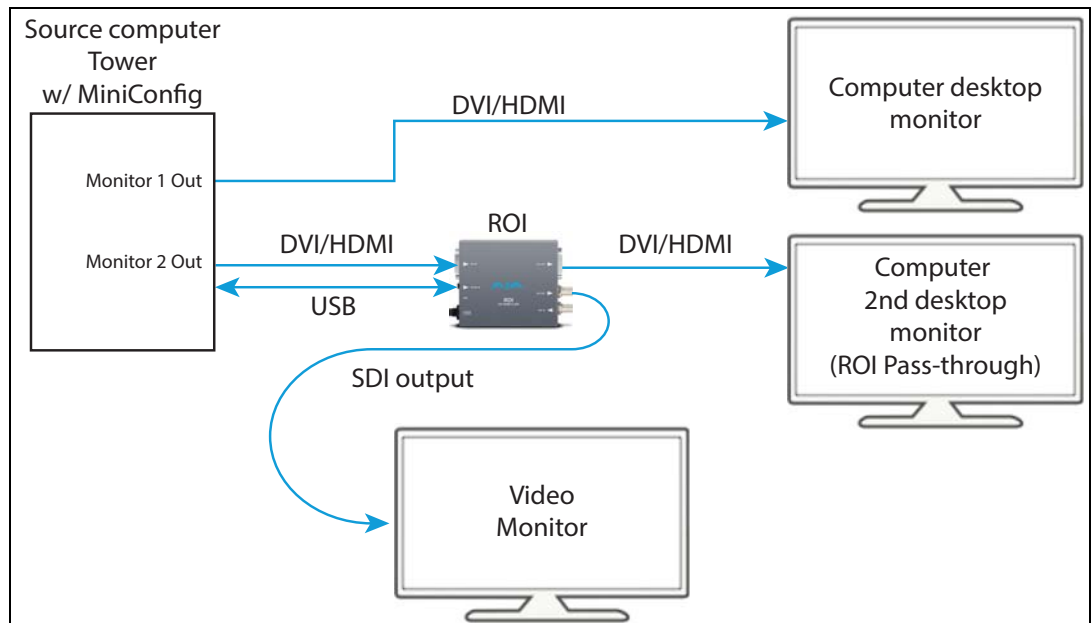

Figure 5. ROI with Tower Computer & Two Monitors, System Interconnect Diagram

Installation

Typically, ROI installation consists of the following steps:

1. Ensure the ROI is disconnected from power.
2. Connect your computer or video console (DVI/HDMI) monitor output to the ROI DVI input connector.
3. Connect the ROI DVI output connector to a second computer monitor (optional).
4. Connect video monitor to the converter SDI output BNC.
5. Connect two-channel analog audio input to analog audio connector (optional)

6. Apply power to the converter (AJA power supply included).
7. The ROI will now run using the default factory settings. If you wish to alter the factory settings, you'll need to:
 - Install the AJA MiniConfig software (supplied on CD) your computer
 - Attach the ROI converter via USB cable (included)
 - Make your changes using MiniConfig setup screens.

This process is detailed in *["Operation" on page 10](#)*.

Chapter 2: Operation

USB Control and Setup—Using AJA MiniConfig

The ROI can be used right out of the box for some applications since it is designed to recognize inputs and perform standard actions automatically by default. However, to use its full capability, you must use AJA's MiniConfig software application for PCs and Macs. This same application can be used to update to new Mini-Converter software released by AJA.

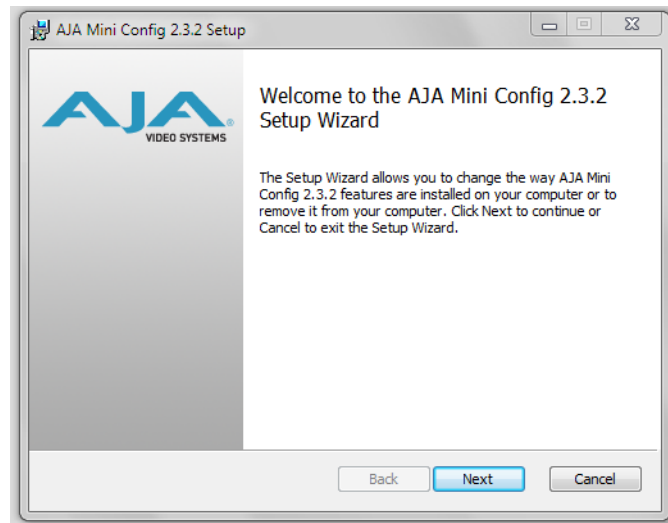

Installing MiniConfig on a Mac: To install the application on a Mac, you may download the application for AJA or insert the CD supplied with the Mini-Converter into the computer. Simply drag the "AJA MiniConfig" app. to your applications folder.

AJA MiniConfig

NOTE: *Macintosh computers must be Intel-based (G5, G4 and earlier models will not work with MiniConfig).*

Installing MiniConfig on a PC:

To install the application on a Windows PC, insert the CD supplied with the Mini-Converter into the computer, locate the "MiniInstaller" application, and then double-click it.

A Setup Wizard will guide you through the installation. Just click Next to begin.

Answer all questions in the subsequent dialogues; when you're done, you will be able to

locate the MiniConfig application in the AJA folder in the Programs listing.

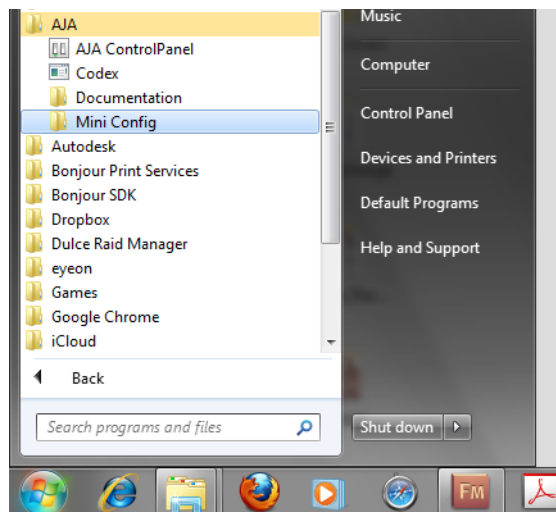

Running MiniConfig

Connect the Mini-Converter to the PC or Mac via the supplied USB cable. Connect the external power supply (supplied) to the Mini-Converter.

NOTE: On a Mac, when the Mini-Converter is connected to the USB port, you may see an alert like that shown following. If you do, press *Cancel*—this alert can be ignored.

PC Startup: To run MiniConfig on a PC, find the AJA MiniConfig in the program list and locate the AJA folder and the MiniConfig application inside.

Mac Startup: To run MiniConfig on a Mac, double-click the Applications folder and locate the AJA MiniConfig application. Double-click the application to launch it.

Saving Setups: A *File* menu at the top of the MiniConfig application menu bar allows you to *Save* the state of the Mini-Converter, with your current settings, to a file for later recall. This allows you to set up the converter for different applications, storing each (with *Save*) to a unique name for easy recall—using the *Open* menu item. A *Revert to Factory Settings* menu item similarly allows you to change the settings back to AJA's factory defaults. An *Edit* menu allows you to cut and paste values to/from fields, just as in other applications.

Operating MiniConfig

The MiniConfig application provides a graphic interface for viewing settings and updating software. It consists of an information area at the top that shows the available Mini-Converters attached to the computer via USB, with a graphical rendering of the selected Mini-Converter showing all the BNCs and connectors and their current state.

Colored text next to the connectors indicates the signal type and what the Mini-Converter is doing:

- *Blue* text indicates the values automatically selected
- *Black* text indicates values that you have manually selected
- *Red* text indicates the Mini-Converter is not detecting a signal or cannot negotiate with the attached device

NOTE: Even if no output device is detected, it still shows the signal it is outputting.

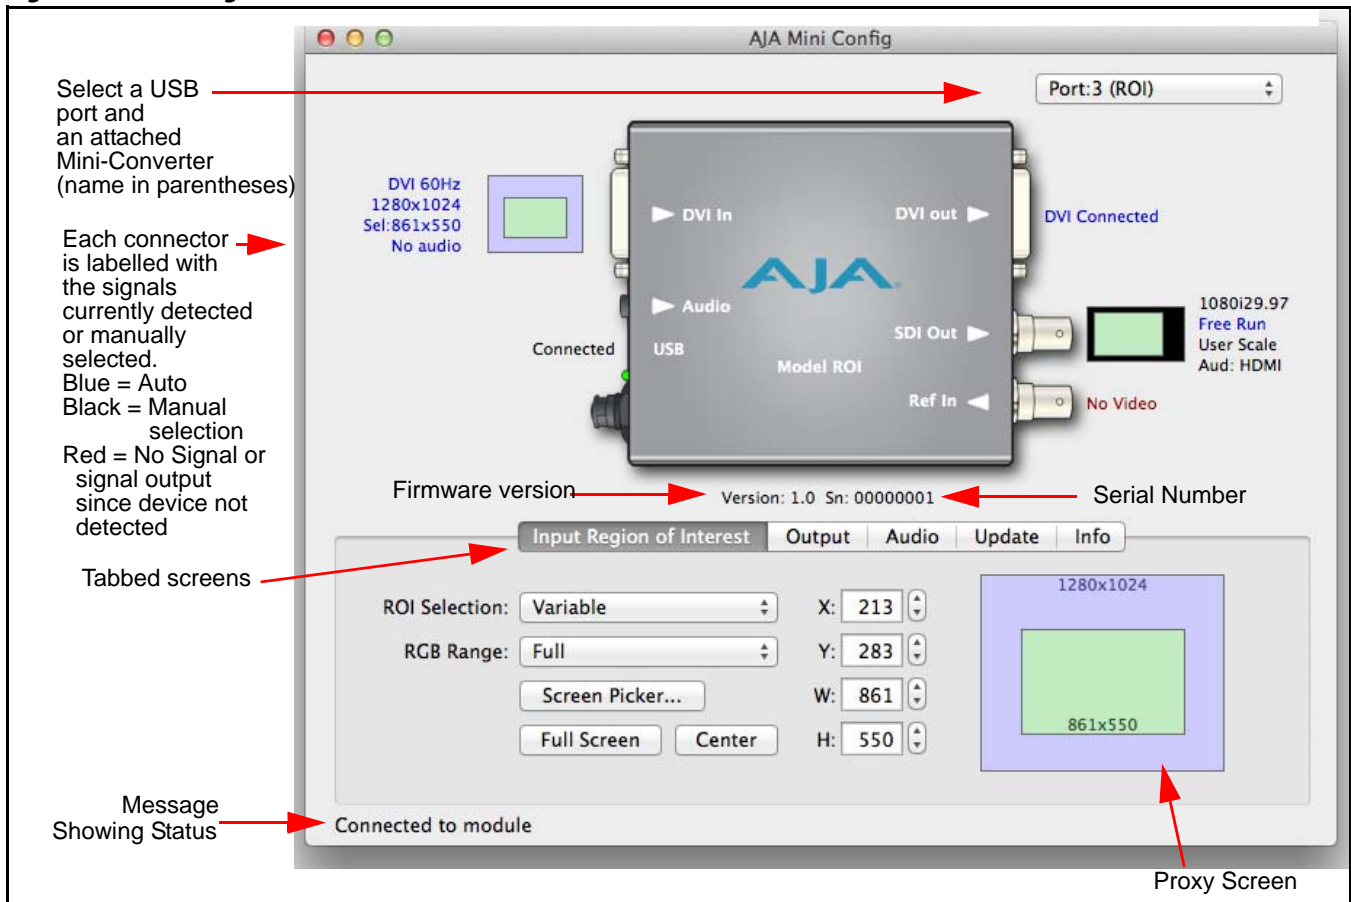

NOTE: Configuration settings in red will change based on the attached output device as well as input signals. For improved accuracy and reliability, you should configure the Mini-Converter only when the target output device is attached and input signals are supplied at the inputs.

Screens are virtually the same on both PC and Mac, with subtle differences that reflect the general look of the platform environment.

Running Multiple Mini-Converters:

MiniConfig can manage multiple AJA Mini-Converters connected via USB—even when they are of differing types. However it only connects to one at a time. You can choose which Mini-Converter you wish to control using the pulldown menu in the upper right hand corner. If you want to configure and update multiple Mini-Converters in parallel, you can do it by running multiple instances of the MiniConfig application and have each control a different Mini-Converter.

Figure 6. MiniConfig, Video Screen

Selecting a Mini-Converter with the pulldown menu causes this application to connect to the selected converter. The graphic of Mini-Converter and text below it provides:

- Type of converter
- Firmware version
- Serial number of the unit.

A status field at the bottom of the screen shows if your application is connected and communicating with the Mini-Converter.

When configuring the Mini-Converter, select it from the top pulldown, view the current settings and change any values. Making a change communicates that new value to the Mini-Converter's non-volatile memory.

The Proxy Screen shows the current region of interest setting in green with the selection pixel size and the bottom and the DVI input pixel size at the top.

Tabbed Screens

The Tabs delineate control screens with groups of controls for each type of task to be performed.

Figure 7. MiniConfig, Screen Tabs

The controls for the actual configuration parameters are specific to each Mini-Converter type. Click on any of the tab buttons:

- Input Region of Interest
- Output
- Audio
- Update
- Info

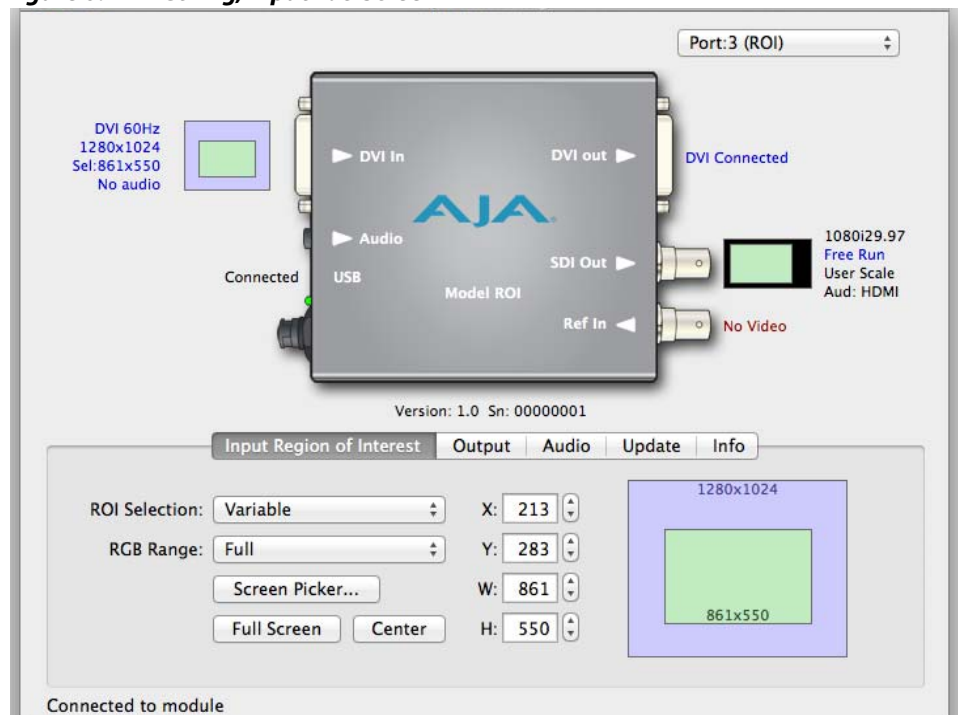

The pane below the tabs will change to match your tab selection. Each of these screens are described on the following pages.

Input Region of Interest Tab

With your Mini-Converter connected and selected, you'll click on the *Input Region of Interest* tab to view and make changes to the converter's input settings.

Any changes you make will be saved, overwriting previous settings.

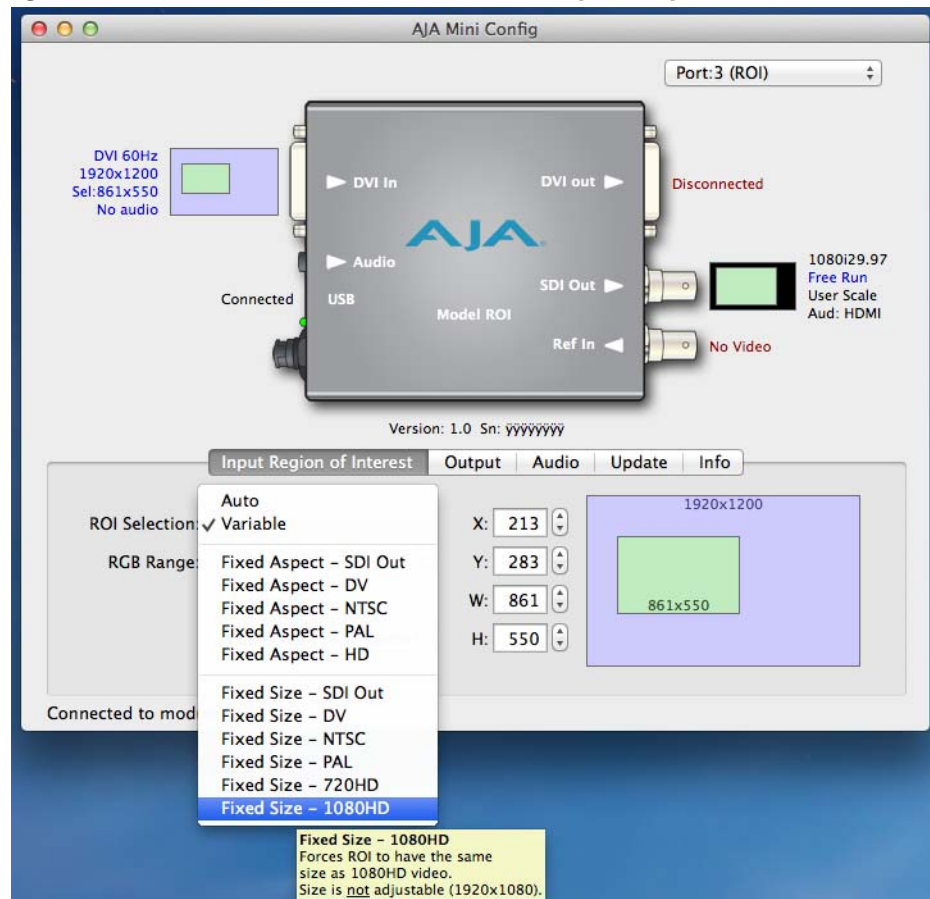

Figure 8. MiniConfig, Input Tab Screen

ROI Selections Using this pulldown menu you can choose a selection mode for *Input Region of Interest*. You can select one of the following:

- Auto: selects the entire DVI/HDMI signal detected at the input to ROI
- Variable: allows user-adjustable selection of all or a portion of the input signal
- *Fixed Aspect Ratio* or *Fixed Size* for common format standards

Figure 9. ROI Selection Pulldown Menu with Tool-tip Description

NOTE: MiniConfig provides a Tool-tip description for each mode.

Auto Selection Auto mode is the default setting. When it is active both the Input and SDI output are fixed in operation as described:

Auto: Scales input ROI (region-of-interest) as large as possible to fit into the SDI output region while maintaining the ROI's aspect ratio. Matting may occur if the ROI aspect ratio does not match the SDI out aspect ratio.

Variable Selection When you select *Variable* as the selection type, you can choose the selection size (the region-of-interest) in three ways:

Variable: Allows user to select arbitrary sized ROI with no constraints.

There are three ways to adjust ROI:

- Use the X,Y coordinate and W,H (width, height) size fields. Within these fields, you can use your keyboard arrow keys to increment one pixel at a time for fine adjustment.

- Drag the edges of the image representation (green proxy screen) at the right of the selection pane.
- Use the Screen Picker button to produce a full-sized image with highlighted crop boundary box in the pass through monitor (ROI DVI output). Then drag the image sides to the desired location. (Refer to *“Typical ROI Configurations”* on page 7.

NOTE: If MiniConfig cannot find a monitor connected to your host computer that matches the monitor size connected to the ROI, you will see the following warning message

NOTE: When using Screen Picker the Mini Config control panel must be located on the Pass-through computer monitor. The MiniConfig panel and monitor share the same resolution and selection control is precise.

Figure 10. Screen Picker Cropping Overlay

Click and Drag Options When using the drag method for picture placement or resizing, you may desire to use the Option/ALT and Shift keys for precise adjustments.

Option/ALT key: For more control, hold down the option/ALT key while dragging the image boundary. You will notice that the selection changes in a more gradual pixel-by-pixel manner regardless of your drag speed.

Shift key: You may change the image size while maintaining the current aspect ratio, by holding down the Shift key as you drag.

Arrow Keys: You may also use the keyboard arrows to increment size and placement of a variable ROI selection one pixel at a time in X,Y,H,W fields and in the proxy and Screen Picker screens. (The up/down arrow keys can also be used to step through some menu selections.)

NOTE: The adjustments made on the green proxy screens and Screen Picker are live and can be viewed on the SDI output.

IMPORTANT: When a “region of interest” function has been set-up, the region-of-interest will continue to operate in the stand-alone mode if the DVI input format remains the same. If the input format changes, the “region of interest” will automatically be turned off, but will return if the video format for which it was set-up for returns.

Fixed Aspect These selections offer a list preset region-of-interest aspect ratio selections that are precise standards for SDI, DV, NTSC, PAL, and HD.

In this mode, size of the selected region can change but aspect ratio is held constant. These Tool-tip descriptions will be displayed:

Fixed Aspect - SDI Out: Forces ROI to have the same aspect ratio as current *SDI Out Format* setting.

Fixed Aspect - DV: Forces ROI to have the same aspect ratio as DV video. Size is adjustable.

Fixed Aspect - NTSC: Forces ROI to have the same aspect ratio as NTSC video. Size is adjustable.

Fixed Aspect - PAL: Forces ROI to have the same aspect ratio as PAL video (5:4) Size is adjustable.

Fixed Aspect - HD: Forces ROI to have the same aspect ratio as HD video (16:9). Size is adjustable.

Fixed Size These selections enable you to choose a preset geometry that fills the SDI output with no scaling. As noted above each is described in a Tool-tip description. Choose from the following:

Fixed Size - SDI Out: Forces ROI to have the same size as current SDI Out Format setting. Size is not adjustable.

Fixed Size - DV: Forces ROI to have the same size as DV video. Size is not adjustable (720x480)

Fixed Size - NTSC: Forces ROI to have the same size as NTSC video. Size is not adjustable (720x486).

Fixed Size - PAL: Forces ROI to have the same size as PAL video. Size is not adjustable (720x576).

Fixed Size - 720HD: Forces ROI to have the same size as 720HD video. Size is not adjustable (1280x720).

Fixed Size - 1080HD: Forces ROI to have the same size as 1080HD video. Size is not adjustable (1920x1080).

In this mode, the ROI selection can change position on the input screen but the size cannot be changed. These settings allow you to easily select standard video sizes for ROI.

RGB Range Menu The RGB Range pulldown menu allows you to select either Full range (0-1023) or SMPTE range (typically 64-940) for RGB color input.

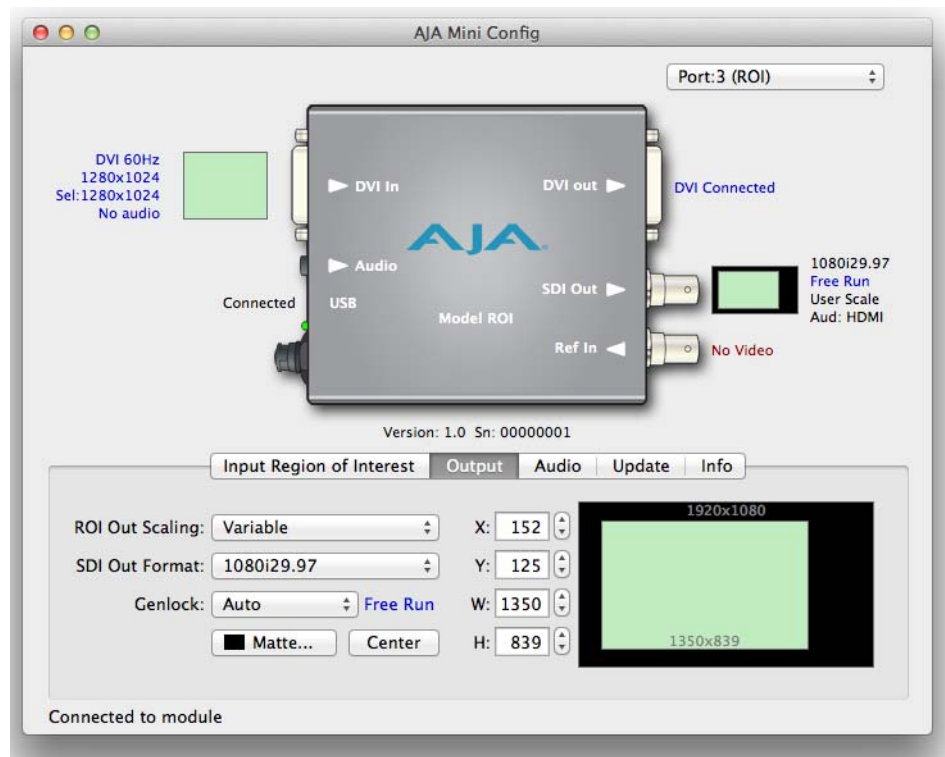

Full Screen Button Click the Full Screen button to quickly set the ROI to the full input raster size.

Center Button If you choose anything other than a full-sized image (Auto) in the ROI *Select* menu, you will have complete control of where the region of interest selection is placed. To quickly and precisely center the region-of-interest, click the Center button.

Output Tab

Use the Output Tab to adjust the following parameters.

Figure 11. Output Screen

ROI Output Scaling Use the ROI Output Scaling pulldown menu to select one of the following:

Figure 12. ROI Output Scaling Menu

Auto: Automatically scales ROI to maximum size with fixed aspect ratio defined by input ROI. Also, forces input mode to Auto which selects full screen of input as ROI.

Fixed Aspect – Matte: Scales ROI to maximum size to fit output region while maintaining ROI's aspect ratio. Matting may occur if input aspect ratio does not match output aspect ratio.

Full Screen: Scales ROI to maximum size to fit output geometry. This may change aspect ratio of ROI image.
No matting will occur.

None – Crop/Matte: No scaling occurs to ROI. It is centered in output region using cropping or matting only.

Variable: Allows user to arbitrarily change position and scaling of ROI as it is placed into the output region.

SDI Output Format The pulldown menu offers a full range of SDI Video Formats for output. For the complete list, see [“Formats” on page 24](#). The format selection is reported in the MiniConfig graphic depicting the SDI Output.

Genlock The Genlock pulldown menu offers the following options:

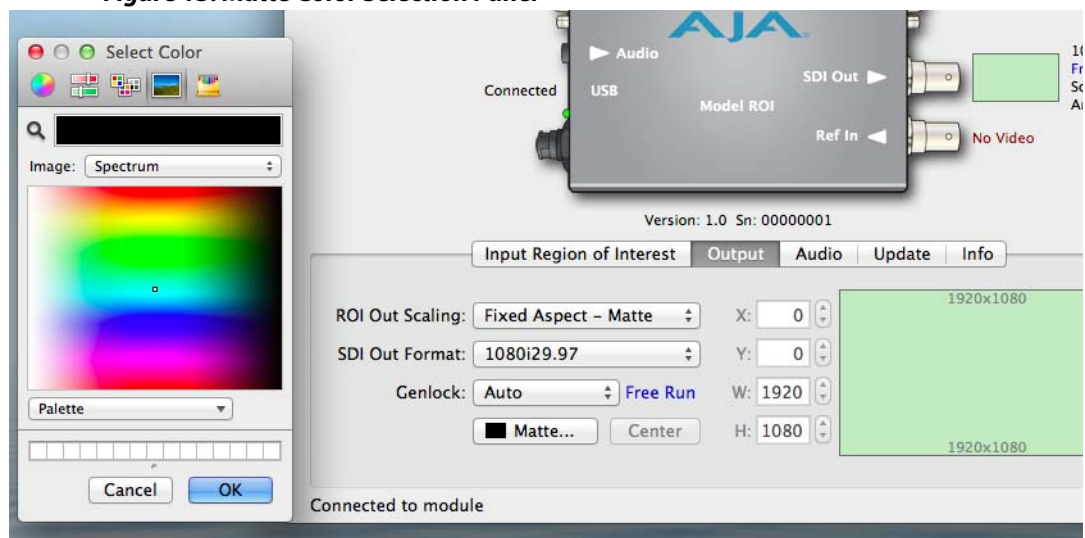

- Auto – use Ref if present, then Input signal if valid, then free-run
- Free-run – no reference lock
- Ref In – Lock to the Video Reference input
- HDMI – Lock to the DVI/HDMI Input (if valid video rate)

NOTE: Currently, ROI can only lock to HDMI formats that have a SMPTE raster and frame rate and are within 50 ppm of the SDI output format.

NOTE: The actual resultant Genlock status is reported to the right of the selection menu.

Matte Background Click the Matte button you to pull up the matte color panel that offers various modes of background color selection.

Figure 13. Matte Color Selection Panel

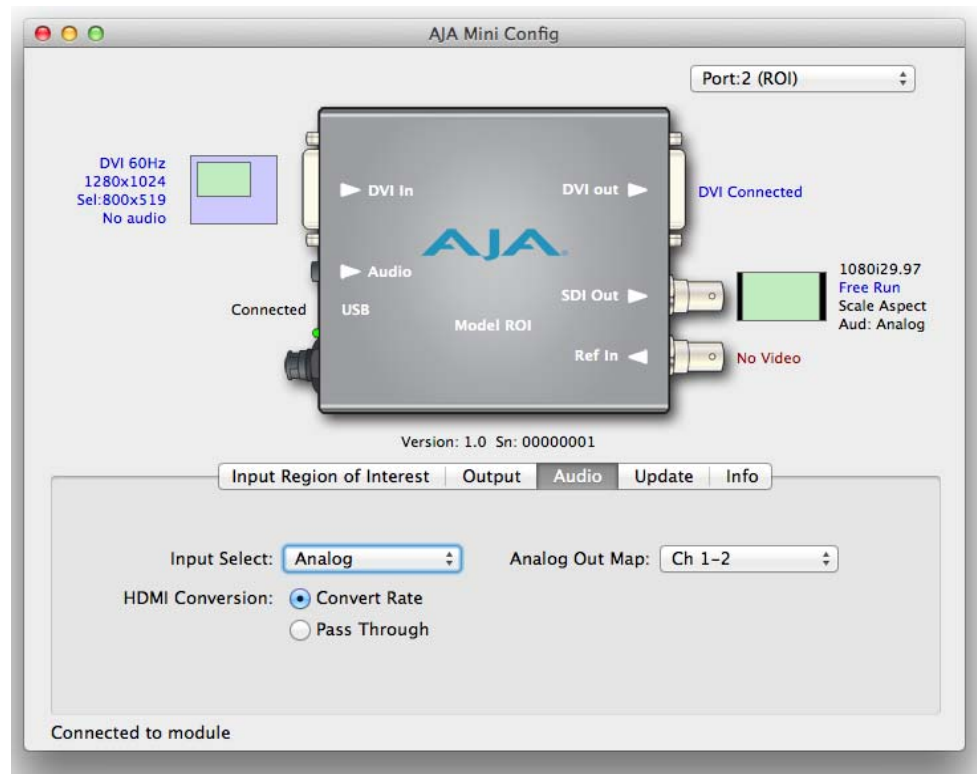

Center Button If you select *Variable* in the *ROI Out Scaling* menu, you will have complete control of where the ROI is placed in the output and how it is scaled. You can adjust the picture location and size in the SDI output using the X,Y, H, W fields or dragging in the proxy screen. To quickly center the image, click the Center button.

Audio Tab

In default mode, ROI passes the eight channels of embedded audio from HDMI input.

NOTE: If the input is DVI, there is no audio included. DVI signal format does not provide audio embedding.

Figure 14. Audio Tab Screen

Input Select **Figure 15. Audio Tab Screen Pulldown Menus**

HDMI: This selection passes the 8 channels of embedded HDMI audio to the SDI output.

Analog: This selection passes only the Analog audio input for inclusion into the SDI audio stream. In this case, you can use the *Analog Out Map* pulldown menu to select the specific channel pair you want to carry the signal.

Analog + HDMI: This selection causes the Analog audio input to replace one pair of the HDMI audio channels on the SDI output. The analog audio is inserted on the channels defined by the *Analog Out Map* pulldown.

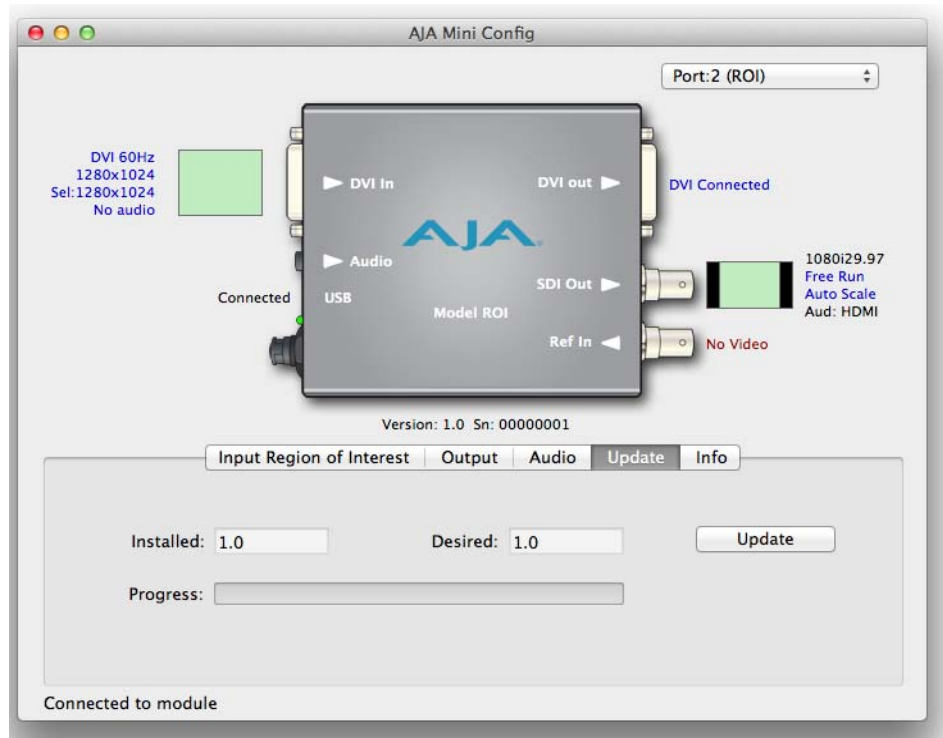

None: No audio is output (mute).

HDMI Conversion: The *Convert Rate* button enables ROI to convert incoming HDMI audio between 32 kHz to 96 kHz to 48 kHz (the ROI native audio standard). If you don't want to convert, choose *Pass Through*.

Update Tab Screen

Use this Update screen to view the software version currently installed on the converter or install new software.

Figure 16. MiniConfig, Update Screen

NOTE: When discussing Mini-Converters, “Firmware” is software that will be stored in the Mini-Converter’s non-volatile memory and used when it is powered up. This is something different than the MiniConfig application software. The version numbers shown in the Update screen refer only to the firmware.

The following fields and control are present in this screen:

- Installed:** This field shows the version of the firmware currently installed inside the Mini-Converter.
- Desired:** This field shows the version of firmware embedded in the MiniConfig application which you can install into the Mini-Converter by clicking the *Update* button.
- Update:** This button initiates a software update operation loading the “Desired” version of firmware into the Mini-Converter’s non-volatile memory.
- Progress:** This indicator bar shows the progress of software being installed.

Software Update Procedure

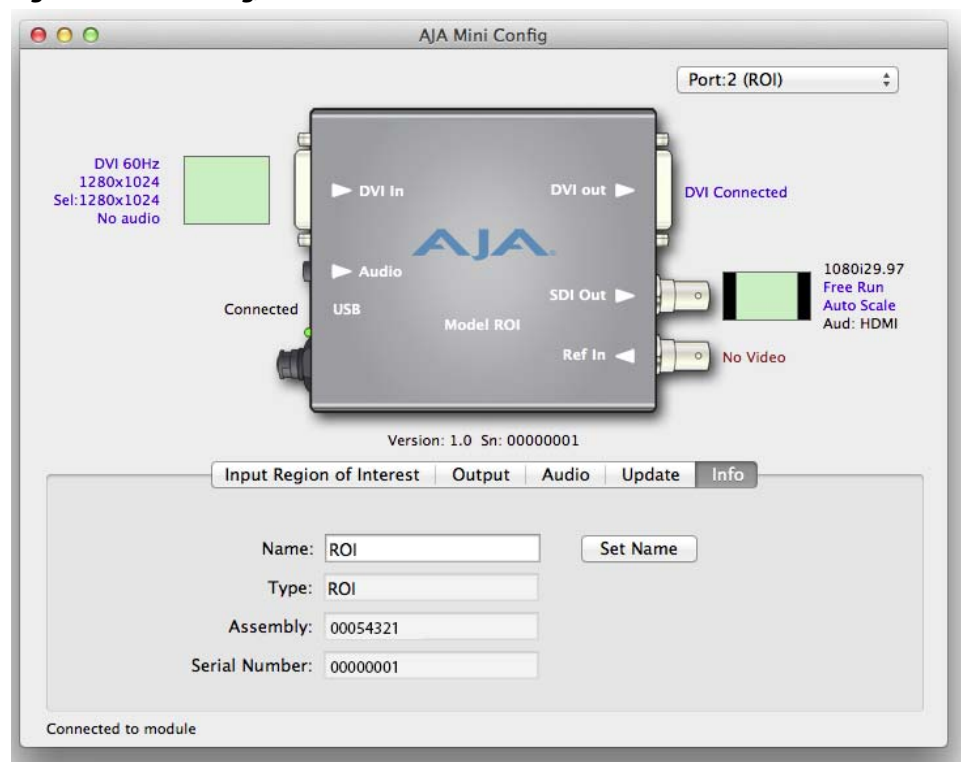

1. Check the AJA website for new MiniConfig software for your Mini-Converter. If new software is found, download it and uncompress the file archive (zip). Here is the URL to use when checking:
<http://www.aja.com/support/converters/converters-mini-rackmount.php>
2. Connect the Mini-Converter to a Mac or PC via a USB port on the computer and run the new MiniConfig software just downloaded.
3. Click on the Update tab screen.
4. Check the Installed version level against the Desired version level. If the Desired is newer, then click the *Update* button to download the new firmware to the Mini-Converter; progress will be shown via the "Progress" thermometer bar. When you click Update, MiniConfig will provide a dialog asking you to confirm that you really want to update the firmware (see below).

Info Tab Screen

This screen provides basic information about the Mini-Converter. This information is mostly useful when calling AJA Support for service or technical support.

Figure 17. MiniConfig, Info Screen

Name: This field allows you to give your Mini-Converter a name. This may be useful if you have several Mini-Converters attached to a Mac/PC via USB so you can distinguish one of them easily (especially if they're the same model). In the example show previously, the ROI has been named "ROI."

Type: This is the factory set model name of the Mini-Converter (ROI).

Assembly: This is the factory assembly number.

Serial Number: This is the factory set unique serial number of your ROI. If you ever call AJA Support for service, you may be asked for this number.

Appendix A: Specifications

DVI Input • DVI-D connector

Formats • Computer Signals:

- VGA (640x480) minimum
- WUXGA (1920x1200) 60 Hz max

NOTE: Frame rates limited by the 165Mhz max rate of the DVI Rx

• Video Signals:

- 525i/625
- 480p/576p (DSLR cameras)
- 720p 23.98/24/25/29.97/30/50/59.94/60
- 1080i 50/59.94
- 1080p 23.98/24/25/29.97/30/50/59.94/60

Input Data Range Control • 1-255 (default 8 bit nomenclature)

- 16-235

Reference Input • Color Black

- Tri-Level sync

Video Outputs • DVI - DVI-D loop through

- SDI - 3G/HD/SD-SDI, SMPTE-259/292/296/424/425, 1 x BNC
 - 525i 29.97
 - 625i 25
 - 720p 50, 59.94, 60
 - 1080i 25, 29.97, 30
 - 1080p 23.98, 24, 25, 29.97, 30
 - 1080p 50, 59.94, 60 - SMPTE 425-1 Level A Mapping structure 1 (1920X1080 4:2:2 10-bit YCbCr)

Audio Inputs • Analog 3.5mm TRS, 2-channel

- HDMI embedded audio, 24-bit, 8-channel

Audio Output • SDI embedded audio, 24-bit, 2-channel or 8-channel

HDCP • ROI does not encode the HDMI output with HDCP encryption

User Controls • USB port used with supplied cable and MiniConfig software application to configure device via Mac or Windows

Physical • 5.765" x 4.020" x 0.9" (146.431mm x 102.108mm x 22.86mm)

Power • 5-18VDC Regulated, 13 Watts, Power Supply Required (included with purchase)

Appendix B: Safety & Compliance

Federal Communications Commission (FCC) Compliance Notices

Class B Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15, Subpart B of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a commercial installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Canadian ICES Statement

Canadian Department of Communications Radio Interference Regulations

This digital apparatus does not exceed the Class B limits for radio-noise emissions from a digital apparatus as set out in the Radio Interference Regulations of the Canadian Department of Communications. This Class B digital apparatus complies with Canadian ICES-003.

Règlement sur le brouillage radioélectrique du ministère des Communications

Cet appareil numérique respecte les limites de bruits radioélectriques visant les appareils numériques de classe B prescrites dans le Règlement sur le brouillage radioélectrique du ministère des Communications du Canada. Cet appareil numérique de la Classe B est conforme à la norme NMB-003 du Canada.

European Union and European Free Trade Association (EFTA) Regulatory Compliance

This equipment may be operated in the countries that comprise the member countries of the European Union and the European Free Trade Association. These countries, listed in the following paragraph, are referred to as The European Community throughout this document:

AUSTRIA, BELGIUM, BULGARIA, CYPRUS, CZECH REPUBLIC, DENMARK, ESTONIA, FINLAND, FRANCE, GERMANY, GREECE, HUNGARY, IRELAND, ITALY, LATVIA, LITHUANIA, LUXEMBOURG, MALTA, NETHERLANDS, POLAND, PORTUGAL, ROMANIA, SLOVAKIA, SLOVENIA, SPAIN, SWEDEN, UNITED KINGDOM, ICELAND, LICHTENSTEIN, NORWAY, SWITZERLAND

Declaration of Conformity

Marking by this symbol indicates compliance with the Essential Requirements of the EMC Directive of the European Union 2004/108/EC.

This equipment meets the following conformance standards:

Safety: EN 60065: 2002 + A1: 2006 + A11: 2008 + A2: 2010 + A12: 2011 (GS License)

IEC 60065: 2001 + A1: 2005 + A2: 2010, (CB Scheme Report/Certificate)

Additional licenses issued for specific countries available on request.

Emissions: EN 55103-1: 2009, CISPR 22: 2008, EN 61000-3-2: 2009-04, EN 61000-3-3: 2008-06

Environments: E2, E3, and E4

Immunity: EN 55103-2: 2009, EN 61000-4-2: 2008-12, EN 61000-4-3: 2010-04, EN 61000-4-4: 2011-03,

EN 61000-4-5: 2005-11, EN 61000-4-6: 2008-10, EN 61000-4-11: 2004-03

Environments: E2, E3, and E4

The product is also licensed for additional country specific standards as required for the International Marketplace.

Warning!!

This is a Class B product. In a domestic environment, this product may cause radio interference, in which case, the user may be required to take appropriate measures.

Achtung! Dieses ist ein Gerät der Funkstörgrenzwertklasse B. In Wohnbereichen können bei Betrieb dieses Gerätes Rundfunkstörungen auftreten, in welchen Fällen der Benutzer für entsprechende Gegenmaßnahmen verantwortlich ist.

Attention! Ceci est un produit de Classe B. Dans un environnement domestique, ce produit risque de créer des interférences radioélectriques, il appartiendra alors à l'utilisateur de prendre les mesures spécifiques appropriées.

Korea KCC Compliance Statement

Class	User's Guide
B급 기기 (가정용 방송통신기자재)	이 기기는 가정용(B급) 전자파적합기기로서 주로 가정에서 사용하는 것을 목적으로 하며, 모든 지역에서 사용할 수 있습니다.
Class B (Broadcasting Communication Equipment for Home Use)	As an electromagnetic wave equipment for home use (Class B), this equipment is intended to use mainly for home use and may be used in all areas.

Taiwan Compliance Statement

This is a Class B product based on the standard of the Bureau of Standards, Metrology and Inspection (BSMI) CNS 13438, Class B.

Japanese Compliance Statement

Class B ITE

この装置は、クラス B 情報技術装置です。この装置は、家庭環境で使用することを目的としています。この装置がラジオやテレビジョン受信機に近接して使用されると、受信障害を引き起こすことがあります。

取扱説明書に従って正しい取り扱いをして下さい。

VCCI-B

This is a Class B product based on the standard of the VCCI Council. If this is used near a radio or television receiver in a domestic environment, it may cause radio interference. Install and use the equipment according to the instruction manual.

Translated caution statements, warning conventions & messages

The following caution statements, warning conventions, and warning messages apply to this product and manual.

Before operating your Mini-Converter, please read this document

Warning!

Read and follow all warning notices and instructions marked on the product or included in the documentation.

Avertissement ! Lisez et conformez-vous à tous les avis et instructions d'avertissement indiqués sur le produit ou dans la documentation.

Warnung! Lesen und befolgen Sie die Warnhinweise und Anweisungen, die auf dem Produkt angebracht oder in der Dokumentation enthalten sind.

¡Advertencia! Lea y siga todas las instrucciones y advertencias marcadas en el producto o incluidas en la documentación.

Aviso! Leia e siga todos os avisos e instruções assinalados no produto ou incluídos na documentação.

Avviso! Leggere e seguire tutti gli avvisi e le istruzioni presenti sul prodotto o inclusi nella documentazione.

Warning!

Do not use this device near water and clean only with a dry cloth.

Avertissement! N'utilisez pas cet appareil près de l'eau et nettoyez-le seulement avec un tissu sec..

Warnung! Das Gerät nicht in der Nähe von Wasser verwenden und nur mit einem trockenen Tuch säubern.

¡Advertencia! No utilice este dispositivo cerca del agua y límpielo solamente con un paño seco.

Aviso! Não utilize este dispositivo perto da água e limpe-o somente com um pano seco.

Avviso! Non utilizzare questo dispositivo vicino all'acqua e pulirlo soltanto con un panno asciutto.

Warning!

Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.

Avertissement ! Ne bloquez aucune ouverture de ventilation. Suivez les instructions du fabricant lors de l'installation.

Warnung! Die Lüftungsöffnungen dürfen nicht blockiert werden. Nur gemäß den Anweisungen des Herstellers installieren.

¡Advertencia! No bloquee ninguna de las aberturas de la ventilación. Instale de acuerdo con las instrucciones del fabricante.

Aviso! Não obstrua nenhuma das aberturas de ventilação. Instale de acordo com as instruções do fabricante.

Avviso! Non ostruire le aperture di ventilazione. Installare in conformità con le istruzioni del fornitore.

Warning!

Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.

Avertissement ! N'installez pas l'appareil près d'une source de chaleur telle que des radiateurs, des bouches d'air de chauffage, des fourneaux ou d'autres appareils (amplificateurs compris) qui produisent de la chaleur.

Warnung! Nicht in der Nähe von Wärmequellen wie Heizkörpern, Heizregistern, Öfen oder anderen Wärme erzeugenden Geräten (einschließlich Verstärkern) aufstellen.

¡Advertencia! No instale cerca de fuentes de calor tales como radiadores, registros de calor, estufas u otros aparatos (incluidos amplificadores) que generan calor.

Aviso! Não instale perto de nenhuma fonte de calor tal como radiadores, saídas de calor, fogões ou outros aparelhos (incluindo amplificadores) que produzam calor.

Avviso! Non installare vicino a fonti di calore come termosifoni, diffusori di aria calda, stufe o altri apparecchi (amplificatori compresi) che emettono calore.

Warning!

Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.

Avertissement ! La sécurité de la prise polarisée ou de la prise de type mise à la terre ne doit en aucun cas être empêchée de fonctionner. Une prise polarisée a deux broches, l'une étant plus large que l'autre. Une prise de type mise à la terre a deux broches et une troisième broche pour la mise à la terre. La broche large ou la troisième broche sont fournies pour votre sécurité. Si la prise fournie ne s'insère pas dans votre prise femelle, consultez un électricien pour le remplacement de la prise femelle obsolète.

Warnung! Der Sicherheitszweck des gepolten bzw. Schukosteckers ist zu berücksichtigen. Ein gepolter Stecker verfügt über zwei Pole, von denen einer breiter als der andere ist. Ein Schukostecker verfügt neben den zwei Polen noch über einen dritten Pol zur Erdung. Der breite Pol bzw. der Erdungspol dienen der Sicherheit. Wenn der zur Verfügung gestellte Stecker nicht in Ihren Anschluss passt, konsultieren Sie einen Elektriker, um den veralteten Anschluss zu ersetzen.

¡Advertencia! No eche por tierra la finalidad del tipo de enchufe polarizado con conexión a tierra. Un enchufe polarizado tiene dos espigas, una más ancha que la otra. Un enchufe con conexión a tierra tiene dos espigas iguales y una tercera espiga que sirve para la conexión a tierra. La espiga ancha, o la tercera espiga, sirven para su seguridad. Si el enchufe suministrado no encaja en el tomacorriente, consulte con un electricista para reemplazar el tomacorriente obsoleto.

Aviso! Não anule a finalidade da segurança da ficha polarizada ou do tipo ligação terra. Uma ficha polarizada tem duas lâminas sendo uma mais larga do que a outra. Uma ficha do tipo de ligação à terra tem duas lâminas e um terceiro terminal de ligação à terra. A lâmina larga ou o terceiro terminal são fornecidos para sua segurança. Se a ficha

fornecida não couber na sua tomada, consulte um electricista para a substituição da tomada obsoleta.

Avviso! Non compromettere la sicurezza della spina polarizzata o con messa a terra. Una spina polarizzata ha due spinotti, di cui uno più largo. Una spina con messa a terra ha due spinotti e un terzo polo per la messa a terra. Lo spinotto largo o il terzo polo sono forniti per motivi di sicurezza. Se la spina fornita non si inserisce nella presa di corrente, contattare un elettricista per la sostituzione della presa obsoleta.

Warning!

Since the Mains plug is used as the disconnection for the device, it must remain readily accessible and operable.

Avertissement ! Puisque la prise principale est utilisée pour débrancher l'appareil, elle doit rester aisément accessible et fonctionnelle.

Warnung! Da der Netzstecker als Trennvorrichtung dient, muss er stets zugänglich und funktionsfähig sein.

¡Advertencia! Puesto que el enchufe de la red eléctrica se utiliza como dispositivo de desconexión, debe seguir siendo fácilmente accesible y operable.

Aviso! Dado que a ficha principal é utilizada como a desconexão para o dispositivo, esta deve manter-se prontamente acessível e funcional.

Avviso! Poiché il cavo di alimentazione viene usato come dispositivo di sconnessione, deve rimanere prontamente accessibile e operabile.

Warning!

Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the device.

Avertissement ! Protégez le cordon d'alimentation pour que l'on ne marche pas dessus ou qu'on le pince, en particulier au niveau des prises mâles, des réceptacles de convenance, et à l'endroit où il sort de l'appareil.

Warnung! Es muss verhindert werden, auf das Netzanschlusskabel zu treten oder dieses zu knicken, besonders an den Steckern, den Steckerbuchsen und an dem Punkt, an dem das Kabel aus dem Gerät austritt.

¡Advertencia! Puesto que el enchufe de la red eléctrica se utiliza como dispositivo de desconexión, debe seguir siendo fácilmente accesible y operable.

Aviso! Proteja o cabo de alimentação de ser pisado ou de ser comprimido particularmente nas fichas, em tomadas de parede de conveniência e no ponto de onde sai do dispositivo.

Avviso! Proteggere il cavo di alimentazione in modo che nessuno ci cammini sopra e che non venga schiacciato soprattutto in corrispondenza delle spine e del punto in cui esce dal dispositivo.

**Warning!**

Unplug this device during lightning storms or when unused for long periods of time.

Avertissement ! Débranchez cet appareil pendant les orages avec éclairso s'il est inutilisé pendant de longues périodes.

Warnung! Das Gerät ist bei Gewitterstürmen oder wenn es über lange Zeiträume ungenutzt bleibt vom Netz zu trennen.

¡Advertencia! Desenchufe este dispositivo durante tormentas eléctricas o cuando no se lo utilice por largos periodos del tiempo.

Aviso! Desconecte este dispositivo da tomada durante trovoadas ou quando não é utilizado durante longos períodos de tempo.

Avviso! Utilizzare soltanto i collegamenti e gli accessori specificati e/o venduti dal produttore, quali il treppiedi e l'esoscheletro

**Warning!**

Refer all servicing to qualified service personnel. Servicing is required when the device has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the device, the device has been exposed to rain or moisture, does not operate normally, or has been dropped.

Avertissement ! Référez-vous au personnel de service qualifié pour tout entretien. L'entretien est exigé quand l'appareil a été endommagé de quelque manière que ce soit, par exemple lorsque le cordon d'alimentation ou la prise sont endommagés, que du liquide a été versé ou des objets sont tombés dans l'appareil, que l'appareil a été exposé à la pluie ou à l'humidité, ne fonctionne pas normalement ou est tombé.

Warnung! Das Gerät sollte nur von qualifizierten Fachkräften gewartet werden. Eine Wartung ist fällig, wenn das Gerät in irgendeiner Weise beschädigt wurde, wie bei beschädigtem Netzkabel oder Netzstecker, falls Flüssigkeiten oder Objekte in das Gerät gelangen, das Gerät Regen oder Feuchtigkeit ausgesetzt wurde, nicht ordnungsgemäß funktioniert oder fallen gelassen wurde.

¡Advertencia! Consulte al personal calificado por cuestiones de reparación. El servicio de reparación se requiere cuando el dispositivo ha recibido cualquier tipo de daño, por ejemplo cable o espigas dañadas, se ha derramado líquido o se han caído objetos dentro del dispositivo, el dispositivo ha sido expuesto a la lluvia o humedad, o no funciona de modo normal, o se ha caído.

Aviso! Remeta todos os serviços de manutenção para o pessoal de assistência qualificado. A prestação de serviços de manutenção é exigida quando o dispositivo foi danificado mediante qualquer forma, como um cabo de alimentação ou ficha que se encontra danificado/a, quando foi derramado líquido ou caíram objectos sobre o dispositivo, quando o dispositivo foi exposto à chuva ou à humidade, quando não funciona normalmente ou quando foi deixado cair.

Avviso! Fare riferimento al personale qualificato per tutti gli interventi di assistenza. L'assistenza è necessaria quando il dispositivo è stato danneggiato in qualche modo, ad esempio se il cavo di alimentazione o la spina sono danneggiati, è stato rovesciato del liquido è stato rovesciato o qualche oggetto è caduto nel dispositivo, il dispositivo è stato esposto a pioggia o umidità, non funziona correttamente o è caduto.

Warning!

This device is a Class B product. Operation of this equipment in a residential area is likely to cause harmful interference, in which case users will be required to take whatever measures may be necessary to correct the interference at their own expense.

Attention! Le périphérique est un produit de Classe B. Le fonctionnement de cet équipement dans une zone résidentielle risque de causer des interférences nuisibles, auquel cas l'utilisateur devra y remédier à ses propres frais.

Achtung! Dies ist ein Gerät der Klasse B. Bei Einsatz des Geräts in Wohngebieten kann es Störungen des Radio- und Fernsehempfangs verursachen. In diesem Fall muss der Benutzer alle notwendigen Maßnahmen ergreifen, die möglicherweise nötig sind, um die Störungen auf eigene Rechnung zu beheben.

¡Precaución! Este es un producto clase B. El uso de este equipo en áreas residenciales puede causar interferencias nocivas, en cuyo caso, se requerirá que los usuarios tomen cualquier medida necesaria para corregir la interferencia por cuenta propia.

Cuidado! Este dispositivo é um produto Classe B. Operar este equipamento em uma área residencial provavelmente causará interferência prejudicial; neste caso, espera-se que os usuários tomem as medidas necessárias para corrigir a interferência por sua própria conta.

Attenzione! Questo dispositivo è un prodotto di Classe B. Il funzionamento di questo apparecchio in aree residenziali potrebbe causare interferenze dannose, nel cui caso agli utenti verrà richiesto di adottare tutte le misure necessarie per porre rimedio alle interferenze a proprie spese.

Warning!

Do not open the chassis. There are no user-serviceable parts inside. Opening the chassis will void the warranty unless performed by an AJA service center or licensed facility.

Avertissement ! Ne pas ouvrir le châssis. Aucun élément à l'intérieur du châssis ne peut être réparé par l'utilisateur. La garantie sera annulée si le châssis est ouvert par toute autre personne qu'un technicien d'un centre de service ou d'un établissement agréé AJA.

Warnung! Öffnen Sie das Gehäuse nicht. Keine der Geräteteile können vom Benutzer gewartet werden. Durch das Öffnen des Gehäuses wird die Garantie hinfällig, es sei denn, solche Wartungsarbeiten werden in einem AJA-Service-Center oder einem lizenzierten Betrieb vorgenommen.

¡Advertencia! No abra el chasis. El interior no contiene piezas reparables por el usuario. El abrir el chasis anulará la garantía a menos que se lo haga en un centro de servicio AJA o en un local autorizado.

Advertência! Não abra o chassi. Não há internamente nenhuma peça que permita manutenção pelo usuário. Abrir o chassi anula a garantia, a menos que a abertura seja realizada por uma central de serviços da AJA ou por um local autorizado.

Avvertenza! Non aprire lo chassis. All'interno non ci sono parti riparabili dall'utente. L'apertura dello chassis invaliderà la garanzia se non viene effettuata da un centro ufficiale o autorizzato AJA.

Warning!

Disconnect the external AC power supply line cord(s) from the mains power before moving the unit.

Avvertissement ! Retirez le ou les cordons d'alimentation en CA de la source d'alimentation principale lorsque vous déplacez l'appareil.

Warnung! Trennen Sie die Wechselstrom-Versorgungskabel vom Netzstrom, bevor Sie das Gerät verschieben.

¡Advertencia! Cuando mueva la unidad desenchufe de la red eléctrica el/los cable(s) de la fuente de alimentación CA tipo brick.

Advertência! Remova os cabos CA de alimentação brick da rede elétrica ao mover a unidade.

Avvertenza! Scollegare il cavo dell'alimentatore quando si sposta l'unità.
