## New Mini-Converter

---

### FS-Mini

The FS-Mini is a broadcast quality utility frame sync that packs the production-proven functionality and all of the reliability of AJA’s leading FS frame sync technology into a portable Mini-Converter supporting frame synchronization of untimed 3G-SDI, HD, and SD video signals at an affordable price.

FS-Mini allows users to synchronize and convert a wide range of video formats to their house standard with a 3G-SDI input and output, HDMI output, and a 2-channel RCA style audio output. The FS-Mini also provides high quality up,down,cross-conversion.

The device also features a reference input that can be used to lock to a local reference. It can be simply controlled via local DIP switches or USB and AJA's Mini-Config application.

## Improvements

---

### UDC

- Minor improvements to the bootup power cycle.

## Installing the Latest Software

---

Mini-Converters come from the factory with the most current version of firmware pre-installed. To get the latest version of Mini-Config, visit the AJA website support area and select your Mini-Converter from the list:

<https://www.aja.com/category/mini-converters#support>

The Mini-Config software can be found in the Software section of the support page for your Mini-Converter. Previous releases of the AJA Mini-Config software are also available in the Software Archive section for each supported Mini-Converter.

## Firmware Upgrade Procedure

---

The manual provided with your AJA Mini-Converter describes the firmware update process; please refer to it, in order to properly update your firmware. The product manuals are also installed with the software in the /AJA/Mini-Config/Documentation/folder.

Individual product manuals are available online for download from the Mini-Converter section of the AJA website:
