

# AJA Ki Pro GO – Release Notes v3.0

## Release firmware v3.0 for Ki Pro GO

### Introduction

---

This firmware update is a feature release for the Ki Pro GO.

Be sure to consult the Installation and Operation Guide (user manual) for detailed information about features and configuration guidelines. The most current documentation can always be found in the Support section of [www.aja.com](http://www.aja.com).

### Features, Updates and Improvements in v3.0

---

- Added the ability to use network storage (“NAS”) as a record and playback location via several SMB dialects
- Fixed issue where illegal names could be added through the Gang page
- Fixed issue where audio meters on super out ch2 were being duplicated on ch4
- Fixed issue where SDI embedded audio input had a periodic tick
- Improved playback stability
- Various system performance and stability improvements.

### Firmware Installation Considerations

---

- AJA recommends a Factory Reset under the CONFIG menu prior to updating firmware.
- After a firmware update, the web browser (Safari, Firefox, etc.) may lose its connection. A refresh of the web browser will reconnect the web UI
- Do not attempt firmware updates while recording is in progress. Be sure the device is in the stopped state before performing a firmware update.

## Technical Support

---

AJA Technical Support is free and available to help you answer questions or resolve issues with any of your AJA products.
