- Power: 6.75 watts max per card
- Hot swappable
- Compatible with OG-X-FR, OG-3-FR and DFR-8321 openGear frames
- Five year warranty

Updating Software

_____

Note: DashBoard software (free) is needed to update software, configure, and monitor AJA openGear DashBoard supported cards. https://www.opengear.tv/frame-and-control/control-system/download/

1. Check the AJA website for new software for your OG-C10DA. If new software is found, download it and uncompress the file archive (zip).
2. Click the Upload button in the lower panel of the DashBoard Control System to open the Upload Software Wizard.
3. From the Upload Software Wizard window, select Browse.
4. Navigate to the location of the downloaded .bin file containing the software update. Select the .bin file, then select Open. The Upload Software Wizard window displays characteristics of the selected file for uploading.
5. Click Finish.
6. When the progress bar indicates that the uploading is finished and status indicates "Complete," click OK.
7. To verify the version of software or firmware currently installed on your card, select the Card tab from the center panel of DashBoard.

   NOTE: Before the upload begins, DashBoard will erase the software on the card, taking approximately 20 seconds.
